MEMORANDUM FOR : Project Director of Operations
Project Director of Materiel
Project Security Officer
Project Contracting Officer

SUBJECT : Control of Processed Film from Eastman to Automat

1. As you know, Eastman's performance in developing the film from our operational flights has not been up to expected standards. Similarly, the handling of the negatives, positives, and prints emanating from them to the using agencies has been poorly logged and controlled. I understand that some film which had been processed was shipped from Eastman without a courier accompanying it to safeguard its security.

2. In order to safeguard shipment of processed film and to maintain a complete and proper record and control of this 'Top Secret' material, I want Operations to hold a meeting with the other addressees of this memorandum and to come up with an appropriate system whereby proper control and recording of shipments can be maintained. I assume that either Security or Operations will become the responsible office to which we can turn to get records on all processed film. I wish to be informed of your findings and decisions as a result of this meeting.
